

miniPLAN

Welcome to **miniPLAN**—the new easy-to-use software for measuring buildings. Use our new and unique 'Sketch and Measure' system developed to save you time.

Producing CAD ready floor plans has never been simpler.

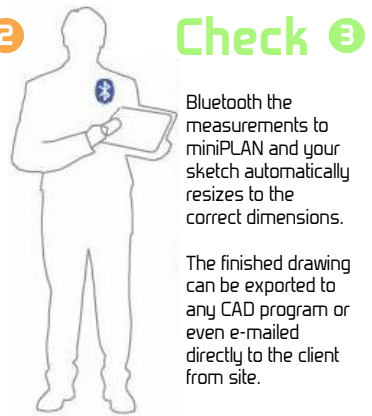

Here's how miniPLAN works...

Sketch out the room/roof or plan shape roughly on your screen or PDA.

Measure the room's dimensions and features with your Disto.

Bluetooth the measurements to miniPLAN and your sketch automatically resizes to the correct dimensions.

The finished drawing can be exported to any CAD program or even e-mailed directly to the client from site.

Building floor plans can be produced more accurately and faster than ever before. Plans can be loaded straight into any CAD or drawing package.

- Replaces the need for paper sketches
- A simple way of measuring buildings and areas
- Reduces drawing/CAD time dramatically

For more information see our website at www.miniplan.co.uk or contact us on 01684 585249

miniPLAN

Key Features and Benefits...

- simple to use - work the way you do already
- measure faster than ever before
- CAD ready floor plans straight from site
- areas and volumes calculated as you work
